

CareerVivid — Google Gemini Competition Submission Evidence

Date: August 13, 2026

Primary GCP Account: `evan@careervivid.app`

Anti-Gravity Agent Account: `zhujiawen519@gmail.com`

1. Executive Summary & Infrastructure Overview

CareerVivid is an AI-powered engineering career preparation platform featuring multimodal AI interview practice, interactive system design whiteboards, dynamic coding pattern visualizers, and real-time Career Agent co-pilots. The platform leverages Google Cloud Platform (GCP), Vertex AI, Google AI Studio Gemini API models (Gemini 2.5 Flash, Gemini 1.5 Pro, Veo 3.1 Lite), and Firebase infrastructure.

2. Gemini Model Observability & API Usage Summary

Model / API Service	Purpose / Pipeline Component	Account / Billing Context	Status
Gemini 2.5 Flash	Real-time Career Agent guidance, mock interview scoring, code analysis	<code>evan@careervivid.app</code>	ACTIVE
Gemini 1.5 Pro	Complex system design architecture generation & structural breakdowns	<code>evan@careervivid.app</code>	ACTIVE
veo-3.1-lite-generate-001	System Design video generation (Beats 1 & 8 mood/motion clips)	<code>evan@careervivid.app</code>	ACTIVE
Vertex AI Platform API	Prediction endpoints, vector embedding search, and model deployments	<code>evan@careervivid.app</code>	ACTIVE
Google Antigravity AI Agent	Autonomous agentic pair-programming, codebase management & automated QA	<code>zhujiawen519@gmail.com</code>	ACTIVE

3. Agent Execution Log Verification

All automated tasks, video generation pipelines, and web app deployments have executed cleanly under Google Antigravity. Execution logs and telemetry demonstrate successful API request cycles, Playwright DOM frame compilations, and zero-error deployment validations across GCP Cloud Hosting and Firebase Functions.
